## 01 PROFILE

My name is Saif Eddin, I love reading, football, fitness, developing, problem-solving, blogging & agriculture. I am a Tunisian based passionate web developer. I've worked on various projects involving both front-end and back-end development. I believe that coding isn't just typing on the keyboard. It's something bigger. coding is about "how to find a solution" "how to think logically" It's about making something useful. For those reasons I love it. Fortunately, I do what I love.

## 02 EMPLOYMENT HISTORY

Feb 2020 — Sep 2020

Beja

### Web Developer at International Coach Start-Up

As a web developer, I work to create various projects by using WordPress, Laravel, and pure PHP. We create websites that are mostly used for eCommerce, eLearning, and other businesses...

Mar 2019 — Mar 2020

### Blogger - Webmaster at Jannah Post

I am the founder of [JannahPost.com](#), a magazine website specialist in self-help and books. It's a great experience for me. I've learned a lot of things like SEO, community management, digital marketing, and more.

Feb 2019 — Jun 2020

Beja

### Web Developer - Internship at Tunisian Global Web

This was an exciting experience for me, and I appreciate the knowledge that I have received at this company. My main task was to develop a website project for business...

## 03 EDUCATION

Sep 2016 — Jun 2019

Beja

### University of jandouba Tunisia

Web Technologies

I got my degree in web design and development, and later on, web development has become my motivation for the further career path...

Sep 2015 — Sep 2016

Bizerte

### University of Carthage

Computer science

I had experience studying at the University of Carthage, but it was short-lived...
